## LOGICAL ERROR CORRECTIVE ACTION

### ERROR MESSAGE

CAUSE	USER ACTION
(0019) UTC not in TUCHA The UTC assigned to the force record is not found in the TUCHA database.	Using the ULN Detail window, search TUCHA for a valid UTC.
(0057) Level 3 OUTSIZE Cargo not = to Level 2 OUTSIZE Cargo The sum of the level 3 Outsize MTON and STON cargo does not equal the level 2 Outsize values. These totals are ADP controlled.	Use the Cargo Editor, Level 4 window to (re)enter a value in entries that do not appear to be rolled up correctly. The application will automatically sum the detailed records and cause that sum to be placed in the Level 3 and Level 2 records.
(0058) Level 3 OVERSIZE Cargo not = to Level 2 OVERSIZE Cargo The sum of the level 3 Oversize MTON and STON cargo does not equal the level 2 Oversize values. These totals are ADP controlled.	Use the Cargo Editor, Level 4 window to (re)enter a value in entries that do not appear to be rolled up correctly. The application will automatically sum the detailed records and cause that sum to be placed in the Level 3 and Level 2 records.
(0061) Authorized Personnel must be greater than 0 A ULN with a P in the fifth position, authorized personnel equal 0; or with a FIC of 8 or 9 that has no authorized personnel or cargo; and the move (in either) case uses non-organic assets causes this error.	Use the ULN Details or Marked Records/Collection to enter an authorized personnel value. (Re)selecting a UTC also may be used if a new FIC of zero is desired.
(0063) PAX must be less than or equal to Authorized Personnel The force record number of TCC passengers is greater than the authorized strength.	Change the passenger and authorized personnel values to indicate that the number of passengers is less than or equal to authorized personnel.
(0064) No associated personnel record for split shipment Only one split-shipment record exists when a pair of records should exist. There must be both cargo and personnel records for split-shipments denoted by FRN fifth characters of "C" and "P."	Create the missing split-shipment record using Create ULN. Modify the existing single "C" or "P" and constitute a nonsplit record. Delete the record causing the error.

## TRANSPORTATION ERROR CORRECTIVE ACTION

### ERROR MESSAGE

	CAUSE	USER ACTION
(0059)	Providing organization must not be blank The PROVORG field is empty and it is not a parent record.	Use the ULN Details or Marked Records/Collection to enter a valid PROVORG code.
(0060)	UIC must not be blank The UIC field is blank and the record is not a shortfall, i.e., PROVORG not equal X.	Use the ULN Details (and GSORTS Select) to enter a valid UIC or enter X in the PROVORG field..
(0112)	Origin GEOLOC is blank The origin GEOLOC is blank when the UIC is filled in.	Using ULN Detail window, either fill in the origin GEOLOC, reenter the UIC, or delete the UIC. The Timeline pop-up may be used to enter the GEOLOC.
(0113)	POE mode must not be blank Mode to the POE is blank and the record is not a parent.	Use the Timeline pop-ups or ULN Detail window to fill in the mode to the POE.
(0114)	POE source must not be blank Source code to the POE is blank and the record is not a parent.	Use the Timeline pop-ups or ULN Detail window to fill in the source code to the POE.
(0178)	POE GEOLOC is blank The POE GEOLOC is not filled in and the record is not a parent nor a shortfall.	Using the ULN Detail window, fill in the POE GEOLOC.
(0184)	POD mode must not be blank The record is not a parent and POD mode information is missing.	Use Timeline pop-ups or ULN Detail window to enter POD mode information.
